

The complexity of today's risk decisions is well known. Beyond cost and risk there are many other factors contributing to these decisions, including type of risk (such as human injury or fatality), the economic impact on the local community, profitability, availability of capital, alternatives for reducing or eliminating the risk, costs of implementing alternatives, codes, standards, regulation, and good industry practice. This book presents a large range of decision aids for risk analysts and decision makers in industry so that vital decisions can be made in a more consistent, logical, and rigorous manner. Though primarily aimed at the process industry, this book can be used by anyone who makes similar decisions in other industries, including those in management science.

Five Diverse Detectives, Appeal (1825): The Appeal of One Half of the Human Race, Women, Against the Pretensions of the Other Half, Men, to Retain Them in Political & Thence ... Domestic Slavery (Womens studies/philosophy), Account Of An Expedition From Pittsburgh To The Rocky Mountains Performed In The Years 1819-1820, The Young Man Entering Business - Primary Source Edition, Searching for God in America, History of the Decline and Fall of the Roman Empire, BlackBook Guide to Miami 2007 (BlackBook Guide series), Black Cat 13: Haunting Tales of Halloween (Volume 1),
